

# TURN ACADEMIC RESEARCH INTO FRONTLINE READINESS

## From Research to Results—Advancing Military Medicine

Geneva is a mission-driven organization with 30+ years of experience partnering with academic institutions to turn bold ideas into funded, impactful military medical research. We specialize in navigating the complexities of the DoD research ecosystem—accelerating the translation of academic discoveries into real-world solutions that advance health and readiness for military and civilian populations.

## Why Partner With Geneva

### Built to Bridge Academia, Industry & Military Medicine

- Cross-sector collaboration and dual-use innovation
- Connections between academia, military, and industry
- Pathways that translate discoveries into deployable solutions

### Comprehensive Research Support

- Expert navigation of DoD regulatory, financial, and acquisition complexities
- Proven capability to build and scale complex research programs and centers globally
- Integrated support for funding, staffing, and infrastructure
- Pathways for tech transfer and commercialization

### Military Access Meets Academic Opportunity

- Access to compliant military populations for clinical trials
- Use of longitudinal data and integrated MHS health records
- Embedded partnerships at military research sites and federal laboratories
- Robust network of military investigators, advanced labs, registries, and SMEs

## Global Access & Expertise

With investigators and sites worldwide, Geneva offers deep expertise in research operations, government contracting, and strategic partnerships to drive successful outcomes.

**315+**

Investigators with  
Military-Relevant Experience

**100+**

Research Sites  
Worldwide

## Your Strategic Partner in Defense Health Innovation

Partner with Geneva to bring your research to the front lines of military medical advancement.
