

YOUR INDUSTRY GATEWAY TO MILITARY RESEARCH

Unlock Military Pathways for Your Medical Research

Geneva is a mission-driven partner with 30+ years of experience advancing military-relevant medical research through strategic collaboration with industry. We accelerate the transition of market-ready technologies into the military medical enterprise—streamlining acquisition, expanding access, and driving real-world deployment across defense and civilian health systems.

Why Partner with Geneva

Strategic Alignment with DoD Priorities

- Direct consultation with military commands to ensure mission relevance
- Deep expertise in navigating complex DoD regulations and acquisition pathways
- Proven track record in federally funded medical R&D

Accelerated Clinical Trial Execution

- Access to broad, highly compliant military populations
- End-to-end trial lifecycle management
- Embedded research teams at military treatment facilities

Scalable, Compliant Infrastructure

- Flexible contracting mechanisms
- Regulatory and ethical oversight
- Expert project leadership with federal and DoD experience
- Rapid staffing and site activation

Real-World Testing for Dual-Use Innovation

- Operational testing in real-world military environments
- Demonstrated expertise in technology maturity and deployment readiness
- Proven capability to build & scale complex research programs and centers globally

Global Access & Expertise

With investigators and sites worldwide, Geneva offers deep expertise in research operations, government contracting, and strategic partnerships to ensure successful outcomes.
