

# GUIDING RESEARCHERS FROM DISCOVERY TO DEPLOYMENT

## From Idea to Impact

Geneva is a mission-driven organization with 30+ years of experience advancing military-relevant medical research alongside investigators and research teams. We navigate the DoD's regulatory and operational landscape to secure funding, amplify research impact, and deliver mission-aligned solutions that improve health outcomes across military and civilian populations.

## Research Advancement from Every Angle

### Strategic Alignment with Military Research Needs

- Direct consultation with military commands to ensure mission relevance
- Multidisciplinary collaboration across DoD, academia, and industry
- Embedded presence at research sites worldwide, including military treatment facilities and federal labs

### Scalable, Compliant Infrastructure

- Flexible contracting pathways, including CRADAs
- Rapid hiring and management of highly qualified research personnel
- Deep expertise in regulatory compliance, data management, and program management

### Translational Impact & Tech Transfer

- Development and dissemination of emerging technologies and knowledge products
- Proven expertise in maturity development and dual-use commercialization
- Scalable infrastructure to bring research-driven innovation to real-world application

## Expertise Built for Military Medical Research

### Pre-Award Support — at no cost to you

- Identifying funding opportunities
- Proposal development & submission
- Study design and technical review
- Regulatory and scientific consultation
- Award and contract negotiation

### Post-Award Support

- Program and project management
- Regulatory compliance and staffing
- Data management and reporting
- Financial oversight and sponsor coordination
- CRADA development and execution

**Let's move military medicine forward—together.**

Collaborate with Geneva to maximize your impact, accelerate discovery, and deliver solutions designed for today's mission and tomorrow's readiness.

**35%** Proposal and Research Win Rate in 2024
